

Bob de Witte

Data & business analyst with 5 years of experience in BI, data and digital transformation, focused on operational analytics, KPI definition and stakeholder-driven decision support. He turns ambiguity into structured analysis, translates business needs into clear requirements, and delivers data-informed recommendations across cross-functional teams.

Experience

Xomnia , Data & Business Analyst (Medior > Senior) - Partnered with IKEA's order allocation domain to translate operational questions into clear business requirements, KPI definitions and decision-support reporting used by 1,000+ unique monthly users globally. The work supported both day-to-day operations and strategic business decisions across functions. - Led a structured evaluation of Copilot in Power BI for Albert Heijn on behalf of Microsoft, assessing business value, governance and adoption scenarios, impacting 5000+ employees directly on how AI was used. - Helped Bridgefund to migrate end-to-end data flows and defined quality controls to improve reporting reliability, reduce ambiguity and deliver a reliable single source of truth for enterprise-wide decision-making. - Reworked recurring reporting from Google Sheets into a Python, dbt, GitHub Actions and Power BI solution, reducing manual effort by 50% and increasing the speed and consistency of management reporting. - Contributes internally to mentoring colleagues, giving trainings, technical sales for new projects and team strategy. Received an early promotion to a senior level.	Apr 2024 – present 2 years 6 months
ADC (Amsterdam Data Collective) , Data Consultant (Medior) - Analysed business and information needs for an agricultural client and translated them into a target-state reporting model, integrating HubSpot, Shopify, HRM and CRM data to support management reporting and operational oversight. The new data connections enabled a more reliable reporting foundation, reduced manual reporting effort by 2 days per month, and improved visibility for operational decision-making across teams. - Modernized internal reporting from Excel to an Azure and Power BI stack, reducing monthly manual reporting effort from 2 days to 15 minutes and increasing the reliability of recurring outputs. - Co-developed a <u>website</u> to improve access to dementia-related information for Dutch municipalities and support better-informed guidance.	Sept 2023 – Mar 2024 7 months
Harvest , Data Consultant (Junior) - Led data strategy, analysis and reporting initiatives for the largest roadside assistance provider in the Netherlands, working closely with the Business Change & Innovation department to translate operational questions into decision-relevant analytics. - Facilitated decision-making by presenting findings and recommendations to management and board-level stakeholders, supporting strategic prioritisation and operational improvement. - Completed the Harvest Data Engineering programme, including 20 masterclasses, broadening expertise across data engineering, data science and applied analytics in a business context.	May 2022 – Aug 2023 1 year 4 months
Accenture , Data & AI Intern - Conducted research into automated image data cleaning techniques for deep learning computer vision algorithms, with a focus on improving data quality and reducing manual remediation. - Published academic work and won best presentation <u>award</u> at IPMV 2022: Witte, B. D., Bouarfa, S., & Geradts, Z. (2022, March). A quantitative comparison of automated cleaning techniques for web scraped image data of 'Smart Cities'. In Proceedings of the 4th International Conference on Image Processing and Machine Vision (pp. 64-71).	Sept 2021 – Feb 2022 6 months
Bynder , Data Scientist (Junior) Identified churn indicators and built a machine learning model to predict customer churn, supporting retention efforts with a more evidence-based prioritisation of interventions.	May 2021 – Aug 2021 4 months

Education

MSc	University of Amsterdam (UvA) , Information Studies: Data Science GPA: 8.5/10, Magna Cum Laude Thesis grade: 8.5	Sept 2020 – Jan 2022
BSc	University of Amsterdam (UvA) , Physics & Astronomy GPA: 8.1/10, Cum Laude Thesis grade: 8.0	Sept 2016 – Aug 2020
	University of Cape Town (UCT) , Exchange Program, Civil Engineering	July 2019 – Dec 2019
	Maurick College , Gymnasium, Nature & Technology GPA: 8.3/10, Cum Laude	Sept 2009 – June 2015

Skills

Business analysis: Requirements gathering, process mapping, gap analysis, KPI definition, stakeholder management, solution design, change management, cross-functional collaboration, project management

Data & reporting: SQL, Python, DAX, Power BI, Looker, reporting, data analysis, data quality, data storytelling, self-service analytics, visualization

Tools / technical proficiency: PySpark, dbt, GitHub, GitHub Actions, Docker, Fivetran, Google (GCP), Fabric, Databricks, Snowflake, Azure, YAML, API frameworks

Certificates: Influential Communication (Bureau Zuidema), Design Thinking, PL-300 Microsoft Power BI, dbt Fundamentals, Azure AZ-900, PSM-1

Domain & Clients: Retail (IKEA, Albert Heijn/Microsoft, Wilderland), Finance (Bridgefund, ABN AMRO Verzekeringen), Manufacturing (Sandvik), Mobility (ANWB), Healthcare (Sigra, VWS)
